

I CLAIM:

1. A moist paper towel package, comprising:

a stack of moist paper towels containing cleansing solution;

5 a bag body adapted to receive said moist paper towels therein, said bag body having a top wall formed with an opening to permit drawing of said moist paper towels out of said bag body, said top wall further having an outer surface, an inner surface, and an adhering region
10 on said outer surface around said opening;

a cover member provided on said adhering region of the top wall for covering said opening;

a layer of releasable adhesive applied to at least one of said adhering region and said cover member to
15 enable said cover member to adhere releasably to said adhering region so as to seal said opening; and

a membrane adhering removably on said inner surface of said top wall so as to isolate said moist paper towels from said adhering region and so as to prevent said
20 cleansing solution from damaging said releasable adhesive.

2. The moist paper towel package of Claim 1, wherein said membrane is made of a material resistant to said cleansing solution contained in said moist paper
25 towels.

3. The moist paper towel package of Claim 1, wherein said cleansing solution is a cleansing agent which can

remove oil and adhesive, said membrane being made of a material resistant to said cleansing solution.

4. The package for moist paper towels of Claim 1, wherein said membrane is adhered electrostatically to said inner surface of said top wall of said bag body and is removable through said opening.

5. The moist paper towel package of Claim 4, wherein said membrane has a size substantially similar to an area of said inner surface.
